

**WHAT IS CLAIMED IS:**

1. A ticketing POS terminal comprising a ticket printer for printing and issuing a plurality of kinds of tickets and a customer display section equipped with an input touch panel, the customer display section displaying, on said input touch panel, a list of the tickets to be issued by the ticket printer, the ticket printer printing and issuing a desired ticket selected by a customer when the customer selectively touches a part of the list where the desired ticket is displayed on said input touch panel, the customer display section further displaying, on said input touch panel, a content and a price of the ticket selected by the customer and a total ticket purchase price.
2. A ticketing POS terminal as claimed in claim 1, wherein the customer display section further displays, on said input touch panel, a guidance message for the customer.
3. A ticketing POS terminal comprising a ticket printer for printing and issuing a plurality of kinds of tickets and a customer display section equipped with an input touch panel, the customer display section displaying, on said input touch panel, a purchase enter key and a list of the tickets to be issued by the ticket printer, the ticket printer printing and issuing a desired ticket selected by a customer when the customer selectively touches a part of the list where the desired ticket is displayed on said input touch panel and subsequently when the customer touches the purchase enter key, the customer display section further displaying, on said input touch panel, a content and a price of the ticket selected by the customer and a total ticket purchase price.
4. A ticketing POS terminal as claimed in claim 3, wherein the customer display section further displays, on said input touch panel, a purchase cancel key so that, when the purchase cancel key is touched

before the purchase enter key is touched, purchase of the ticket selected by the customer is cancelled.

5. A ticketing POS terminal as claimed in claim 3, wherein the customer display section further displays, on said input touch panel, a guidance message for the customer.

6. A ticketing POS terminal as claimed in claim 5, wherein the customer display section displays a message "PLEASE SELECT A TICKET" as the guidance message.

7. A ticketing POS terminal comprising a ticket printer for printing and issuing a plurality of kinds of tickets and a customer display section equipped with an input touch panel, the customer display section displaying, on said input touch panel, a list of the tickets to be issued by the ticket printer, the ticket printer printing and issuing desired tickets selected by a customer when the customer selectively touches parts of the list where the desired tickets are displayed on said input touch panel, the customer display section further displaying, on said input touch panel, a content and a price of each of the tickets selected by the customer and a total ticket purchase price of the tickets selected by the customer.

8. A ticketing POS terminal as claimed in claim 7, wherein the customer display section further displays, on said input touch panel, a guidance message for the customer.

9. A ticketing POS terminal comprising a ticket printer for printing and issuing a plurality of kinds of tickets and a customer display section equipped with an input touch panel, the customer display section displaying, on said input touch panel, a purchase enter key and a list of the tickets to be issued by the ticket printer, the ticket printer printing and issuing desired tickets selected by a customer when the customer selectively touches parts of the list where the desired tickets are displayed on said input touch panel

and subsequently when the customer touches the purchase enter key, the customer display section further displaying, on said input touch panel, a content and a price of each of the tickets selected by the customer and a total ticket purchase price of the tickets selected by the customer.

10. A ticketing POS terminal as claimed in claim 9, wherein the customer display section further displays, on said input touch panel, a purchase cancel key so that, when the purchase cancel key is touched before the purchase enter key is touched, purchase of the tickets selected by the customer is cancelled.

11. A ticketing POS terminal as claimed in claim 9, wherein the customer display section further displays, on said input touch panel, a guidance message for the customer.

12. A ticketing POS terminal as claimed in claim 11, wherein the customer display section displays a message "PLEASE SELECT A TICKET" as the guidance message.
